

Virtual Decisions create immersive and highly-engaging VR experiences for young and vulnerable people that allow them to control real-life scenarios and navigate consequences in safe simulation.

Seeing the consequences of difficult decisions play out in a virtual environment empowers young people to make the right choices when it counts in the real world. Saving lives, reducing risk and improving outcomes for everyone involved.

In a study across West Yorkshire in 2024 Participants and Facilitators agreed:

100%

of facilitators felt the Virtual Decisions programme had a high impact on [participant's] awareness

91%

of facilitators said Virtual Decisions enables re-evaluation of [participant's] behaviours

100%

Improves [participant's] awareness of the risks of gangs and knife crime

95%

Improves [participant's] ability to make informed decisions

95%

Improves [participant's] ability to take positive actions

95%

Increases [participant's] knowledge about knife crime and gangs
